

easycheck

TRW. the right way.

As a world leading automotive aftermarket manufacturer, with a track record of providing the aftermarket with premium parts and tools for over a century, TRW is a name you can trust.

TRW easycheck.
the easy choice.

TRW understands that car electronics are becoming increasingly complicated and now even a simple lubrication and brake service may require special electronic tools to complete. These new technologies will bring many opportunities but not without complications;

- The risk of losing more and more business due to the increasing complexity of modern vehicles.
- Turning new and regular customers away because you can no longer service their vehicle.
- Not knowing which tool is the right choice for you.
- Keeping up with modern technology can require big investment and difficult choices.

TRW easycheck puts you back in control.

TRW easycheck is a handheld electronic service tool with an impressive range of functions. Fully portable, you can read and clear fault codes and carry out service tasks on the spot – saving time and money.

TRW easycheck. it's simple.

Whether you are looking to improve your garage's skill level with the first step in diagnostics, add to your existing solutions with a portable handheld service tool, or you are looking for an affordable electronic service tool for your own tool box, TRW easycheck is the tool for you:

- **simple.** TRW easycheck is simple to use and requires no special training.

- **versatile.** Buy one or more of the available functions and add more anytime you need them.

- **future-proof.** TRW easycheck is continually updated. Purchasing updates will allow you to keep in touch with your customers' needs.

TRW easycheck. it's versatile.

Choose the functions you need now and simply add more functions when you need them.

Read and clear fault codes and carry out service tasks for:

- **brake:** Electric Park Brake and ABS. Including brake operation checks and brake pad replacement.
- **climate:** Automatic Climate Control systems.
- **scan:** Comprehensive EOBD functionality including live data, freeze frame data, actuator operation and more. It also has an extensive range of manufacturer specific codes.
- **service:** Service interval data and service light reset.
- **SRS:** Airbag and pre-tensioner systems.

TRW easycheck. easy options.

Choose a single function, or any combination of functions to suit your individual requirements. With TRW easycheck, there's no need to invest in multiple service tools as you can easily upgrade your tool to include other functions – instantly improving the services you can offer your customers.

Buy TRW easycheck with one function included (YTD700EN), choose your function and buy any additional functions to suit you.

Alternatively buy TRW easycheck with all five functions included (YTD701EN).

Call the free phone activation line and you will be given a unique security key code to enter into TRW easycheck to unlock your functions for life.

In addition a selection of adaptor cables are available for servicing non-EOBD compliant vehicles and systems.

TRW easycheck. it's future-proof.

TRW are continually developing TRW easycheck, keeping up to date with the latest technology and service functionality. Update your TRW easycheck so that you are able to carry out service repairs on the latest and widest range of vehicles – see www.trwaftermarket.com/easycheck for a full vehicle coverage guide.

Offering fantastic value for money as a single service tool, TRW easycheck is a great way for you to get started in electronic service and repair, and keep up to date without the need to invest in complex diagnostic solutions.
