

CATÁLOGO PASTILLAS Y ZAPATAS DE FRENO 2018 / 2019

**TRW**

# Máxima seguridad a su servicio

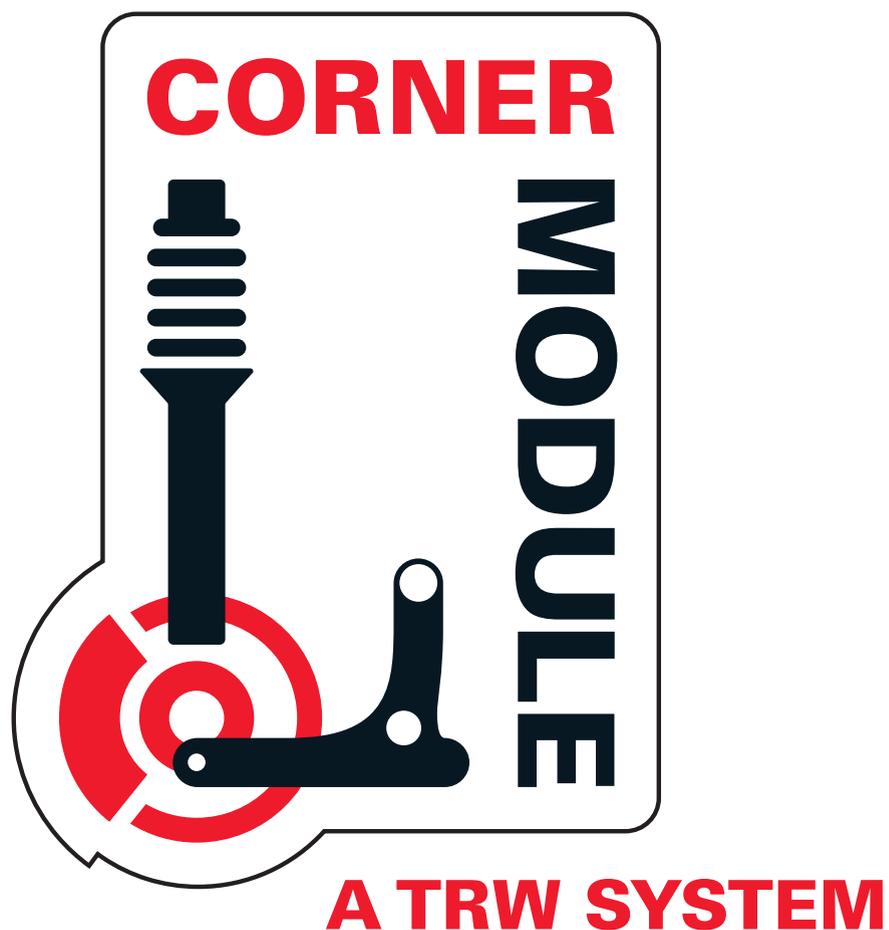

**Elija TRW.**

Estamos orgullosos de haber desarrollado Cotec –  
un innovador revestimiento para todas nuestras pastillas.

**TRW**

## Módulo de Seguridad

### Para una conducción SEGURA:

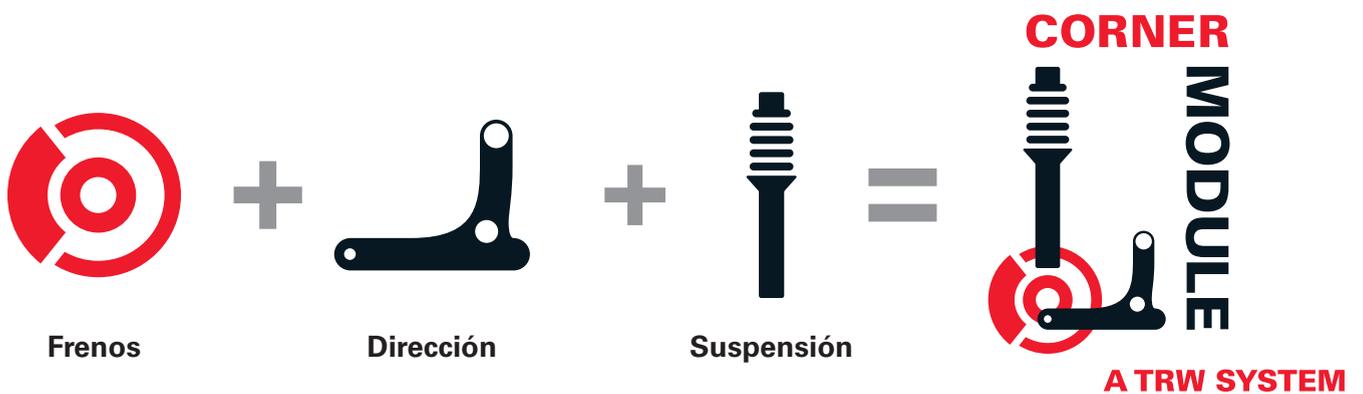

El Sistema de Seguridad **CORNER MODULE** ha logrado integrar los componentes más importantes para un mejor control al conducir el vehículo:

- a) Pastillas y Discos de Frenos
- b) Amortiguadores
- c) Partes para Suspensión y Dirección

Todo en un solo módulo para brindar un óptimo desempeño al conducir.

## Módulo de Seguridad

El Sistema de Seguridad **CORNER MODULE** ofrece una solución simple, segura y confiable al momento de realizar el recambio de componentes en su vehículo.

## Razones para elegir **TRW**

**Cobertura del parque vehicular:** La mayor y más amplia cobertura del parque vehicular en Argentina.

**Solución perfecta para cada vehículo:** La pastilla de freno adecuada para cada modelo.

**Proveedor de Equipo Original:** **TRW** diseña y produce pastillas de freno para las más prestigiosas armadoras automotrices a nivel mundial.

**Bajo nivel de ruido:** Avanzada tecnología que permite ofrecer soluciones con el más bajo nivel de ruido al frenar.

**Amigable con el medio ambiente:** Producidas con materiales amigables con el medio ambiente.

## La solución **PERFECTA** para cada aplicación

**TRW** ha estudiado las necesidades del Parque Vehicular de la región y ofrece la Solución **Perfecta** para cada vehículo, cumpliendo y excediendo las especificaciones de Equipo Original, ofreciendo:

- Frenado seguro en menor distancia.
- Mayor durabilidad.
- Bajos niveles de polvo y ruido.
- La mejor relación costo - beneficio por kilómetro garantizado.

## Pastillas de freno orgánicas

- Coeficiente de fricción estable HG que cumple o excede características de OE otorgando un frenado confiable en todo momento.
- Poder de frenado constante y seguro en cualquier condición de manejo.
- Formulada para todo tipo de vehículos.
- Alta resistencia a la temperatura y desgaste.
- Diseñada bajo especificaciones OE.
- Cumple satisfactoriamente las regulaciones ECR90.

## Pastillas de freno **TRW**

Las Pastillas de Freno **TRW** se fabrican asegurando los más altos niveles de rendimiento, comodidad y seguridad.

**TRW** es uno de los 10 principales proveedores de componentes de seguridad para automóviles en el mundo. Como pionero en el diseño, desarrollo y fabricación de sistemas completos de frenado, módulos de freno y sistemas de control avanzados de conducción activa y pasiva para vehículos.

**TRW** es el proveedor líder de pastillas de freno del Mercado de Aftermarket europeo, ofreciendo:

- Más de 1300 referencias **TRW**.
- Las pastillas **TRW** son producidas y sometidas a los más exigentes test de seguridad y durabilidad.
- **TRW** produce más de 20 millones de juegos por año.
- Las pastillas **TRW** son diseñadas bajo especificaciones OE.

## Materia prima

El material de fricción es la parte más importante de una pastilla de freno y todas las pastillas **TRW** utilizan sus propias con diferentes compuestos que ofrecen óptimas prestaciones y protegen el medio ambiente por ser libres de metales pesados.

Utilizamos una combinación óptima de materias primas que van desde el caucho hasta el grafito, lo que garantiza un coeficiente de fricción estable y el frenado más seguro bajo las más extremas condiciones.

## Pre-quemado (scorching)

El “scorching o pre-quemado” de una pastilla de freno es un proceso que consiste en calentar el material de las pastillas de freno en una plancha a 600-700°C. No todos los proveedores del mercado de repuesto llevan a cabo procedimientos de scorching al mismo nivel que **TRW**.

El scorching mejora significativamente:

- **Comportamiento durante el uso:** El rendimiento se mejora en gran medida la primera vez que el conductor aplica los frenos (asentamiento rápido); las pastillas de freno que no pasan por este proceso alcanzarán este nivel de rendimiento al llegar a 200 kilómetros de uso continuo.
- **Desgaste inicial (fading):** El fading aumenta la fuerza y presión requerida para mantener la desaceleración del vehículo evitando así la cristalización prematura y molestos ruidos.

## Nuevo desarrollo en el pre-quemado (scorching)

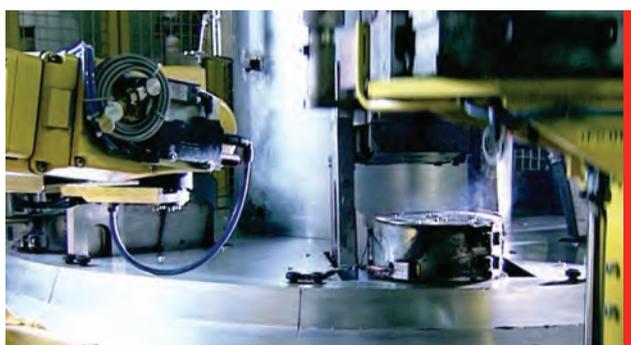

**TRW** hace tiempo que cambió el proceso de scorching de una flama convencional a una placa de calor avanzada; que es hoy en día un estándar de OE.

Esto quiere decir que durante el calentamiento de la placa para el scorching, la pastilla de freno es presionada mediante una prensa (1Tn) a la placa calentada, acelerando así su inflamación por presión y calentamiento. Esto significa menos energía utilizada en el proceso.

Con lo cual **TRW** se catapulta como una empresa responsable en el cuidado del medio ambiente.

## Tecnología de molde profundo

Las pastillas de freno **TRW** se fabrican utilizando la tecnología de moldeo profundo, un proceso llevado a cabo por prensas de moldeo automático. El principal beneficio de este proceso es que la densidad y la porosidad del material son más consistentes, lo que resulta significativa en la aparición de rechinido, mejorando así la comodidad del conductor.

## La seguridad es lo primero

Todas las pastillas de freno **TRW** se someten a un riguroso conjunto de testeos tanto durante el proceso de producción como pruebas en vehículos, lo que posiciona a **TRW** como líder en seguridad en el mercado de Aftermarket.

Para muchos fabricantes de Europa cumplir con las especificaciones ECE R90 es una marca de excelencia. **TRW** desde luego cumple con esta especificación y la supera ampliamente gracias a su propio y exigente protocolo de pruebas en caminos donde se determina para cada desarrollo, rendimiento, confort y se lo somete a la exigente prueba de descenso prolongado en camino de montaña.

## Zapatas de freno

Con las zapatas de freno de **TRW**, podemos garantizar:

- Fabricación ecológica libre de cromo hexavalente, metales pesados y amianto.
- Una gama completa con más de 300 kits de instalación de zapatas para que siempre pueda realizar un montaje correcto.

### Instalación precisa de las zapatas de freno

Los kits de instalación de zapatas de **TRW** reducen los costos y ahorran tiempo. Funcionan sin fallas, ofreciendo la tensión correcta en los resortes, un frenado silencioso y una fuerza de frenado equilibrada. Naturalmente, incluyen todo lo necesario para realizar un trabajo seguro y profesional.

### Algunos consejos sobre zapatas de freno

#### El tamaño importa.

Antes de instalar una zapata de freno **TRW** nueva, mida siempre con cuidado el diámetro máximo de la campana de freno en la que está trabajando. Aparecerá marcado en la propia campana. No utilice nunca campanas de freno si están cerca del diámetro máximo o lo sobrepasan.

#### Menos de 2 mm es muy poco.

En aras de la seguridad y el equilibrio, si descubre que alguna zapata de freno está desgastada por debajo de la marca de los 2 mm, sin duda ha llegado el momento de instalar un eje nuevo completo.

#### Inspección de la placa trasera.

Se encontrará con algunos sistemas de freno de campana que incorporan un orificio de inspección en la placa trasera. Resulta útil, ya que permite ver si los revestimientos de los frenos están desgastados sin tener que desmontar la campana.

## Revestimiento COTEC de TRW

Nuestros desarrolladores han encontrado una manera de que se pueda obtener lo mejor de la sustitución de las pastillas de freno delanteras o traseras. Se denomina **COTEC**.

Este revestimiento de silicato avanzado, se aplica al material de fricción de las pastillas de freno, lo que mejora el contacto entre el disco y la pastilla de freno.

Las pastillas de freno con **COTEC** de **TRW** pueden detener el vehículo hasta siete metros antes que otras pastillas de freno de alta calidad durante las primeras paradas tras un cambio de pastillas (lo que se conoce como período de rodaje). Esta tecnología innovadora hace que podamos superar los resultados de la mayor parte de los competidores durante el período de rodaje o inicial de uso de las pastillas, cuando normalmente el coeficiente de fricción es más bajo de lo normal.

Puesto que mejora la seguridad desde el momento en el que el conductor sale del taller, hemos tomado la decisión de revestir prácticamente todas nuestras pastillas de freno con **COTEC**. Más del 85 % de las pastillas de freno que ofrece **TRW** ya cuentan con revestimiento de **COTEC**.

# BALANCE PERFECTO

TRW mezcla cuidadosamente materiales para darle discos de freno con mayor resistencia a la temperatura y corrosión.

Entregamos grandes innovaciones, porque hemos estado estudiando el arte de frenar durante generaciones.

**TRW**
