

THP / PCF **Power Steering Gears**

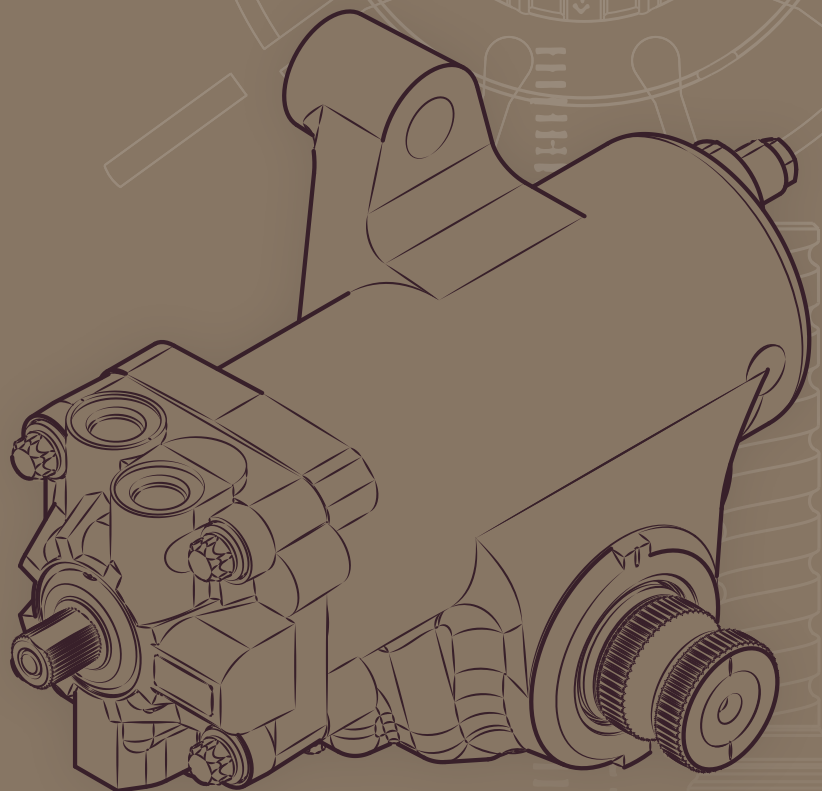

TRW has engineered numerous enhancements into the design of its THP / PCF Series, including an industry-leading power-to-size ratio for durable performance from a compact design. The result is a power steering gear better equipped to maneuver in tight quarters and reduce driver fatigue. A faster steering ratio improves lock-to-lock turns. Lower internal-gear friction allows steering to return to the center more quickly without demanding additional driver exertion. And the positive center feel (PCF) option helps to ensure steady, precise handling when driving straight down the open highway.

THP

- › *Higher pressure ratings reduce overall package size and increase wheel cut*
- › *Reduced friction lessens driver fatigue*

PCF (option)

- › *PCF option improves feel of on-center steering*
- › *Precision in straight-ahead driving reduces driver fatigue and increases long-haul use*

Drive with quality. Drive with reliability. Drive with TRW.

TRW understands a heavy duty vehicle only runs as smoothly as its key components. That's why genuine TRW Heavy Duty Aftermarket products are engineered for optimal performance, designed to fit precisely and proven to operate with OEM systems. Plus, each product comes with ongoing support backed by one of the most respected, trustworthy names in the industry. The TRW Heavy Duty Aftermarket line offers a maximum return on your investment to keep your vehicle, and your business, on the road.
