An entire Harley-Davidson world from TRW

FROM TRW – FOR HARLEY-DAVIDSON

Brake discs • Brake pads • Steel braided brake lines
Clutch components • Steel handlebars and racing clip-ons

1 INCH (25.4 MM) STEEL HANDLEBARS
In many colors and designs with General Certification. Also available with cable hole or cable notch.

RACING CLIP-ONS
The best and easiest way to give a Harley the look of a cafe racer.

CLUTCH FRICTION PLATE KITS
Clutch plates and rear internal plates for many Harley-Davidson models.

STEEL BRAIDED BRAKE LINES
Optimize the pressure points, are very long-lasting and of course look much better than rubber lines.

SCREWS
We have the right screw sets for a wide range of brake discs – including other makes.

If you like Harleys you will love TRW
Whether on the left or right, replacement brake discs from TRW for Harley-Davidson make a good impression. And they do a really good job on either side. Perfect circular run-out, high stability and a successful design – what more could you want?

A road test covering over 22,000 km proved it: even at extreme temperatures the floating brake disc from TRW maintains its shape, is low in noise and offers considerably better performance than fixed disc variants.

Floating TRW brake discs for Harley-Davidson come with General Certification and therefore do not require registration.

Floating brake discs from TRW
Top braking performance for many Harleys

REPLACEMENT DISCS WITH TOP QUALITY
Whether on the left or right, replacement brake discs from TRW for Harley-Davidson make a good impression. And they do a really good job on either side. Perfect circular run-out, high stability and a successful design – what more could you want?

TWO DESIGNS, ONE MISSION
The utmost safety at a fair price. The fixed TRW brake discs for Harley-Davidson all have General Certification and can therefore be simply replaced without registration. Of course, we also optionally offer the right screws for discs with or without counter-boreholes.

The PERFECT PERFORMANCE UPGRADE
The simple and safe retrofit solution for models with standard fixed brake discs. Floating TRW brake discs offer better performance and greater comfort through better heat dissipation and an optimized coefficient of friction.

A road test covering over 22,000 km proved it: even at extreme temperatures the floating brake disc from TRW maintains its shape, is low in noise and offers considerably better performance than fixed disc variants.

Floating TRW brake discs for Harley-Davidson come with General Certification and therefore do not require registration.
